## HIGHLIGHTS

- Encouraging Numbers The Orange County industrial market
  continued to improve, posting a 3.32% vacancy rate for the
  third quarter of 2014, the lowest level since the second quarter
  of 1998. Both vacancy and availability displayed significant
  drops and asking lease rates and occupancy costs continued
  to increase. Net absorption posted over 1.3 million square feet
  of positive absorption during the third quarter.
- Construction There was 625,950 square feet under construction at the end of the third quarter of 2014 and over 1.85 million square feet planned, mostly in Anaheim and Brea. This is the most construction we have seen since 2008. We anticipate more build-to-suit and speculative development emerging later this year.
- Vacancy Direct/sublease space (unoccupied) finished the quarter at 3.32%, the lowest figure seen since the second quarter of 1998, and a decrease of over 20% since the third quarter of 2013. The West County submarket presented the lowest vacancy rate in the county at 2.79%.
- Availability Direct/sublease space being marketed came in at 5.96% for the third quarter of 2014, a 15 basis point decrease from the previous quarter and a decrease of 7.45% from 2013's rate of 6.44%. The lack of available space is creating pent up demand in some size ranges and is applying upward pressure on pricing.
- Lease Rates The average asking triple-net lease rate checked in at \$.63 per square foot per month, one cent higher than the previous quarter and up two cents or 3.28% over 2013's third quarter figure. The South County submarket posted the highest average asking lease rate in the county at \$.74. The record high rate of \$.80 was established in the second and third quarters of 2008.
- Sales Pricing The average asking sales price in the third quarter of 2014 was \$165 per square foot, four dollars and twenty cents higher than the previous quarter and up 10.69% when compared to 2013's third quarter rate. The record high asking price of \$181.23 was established in the third quarter of 2007.

- Absorption The Orange County industrial market posted 1,331,446 square feet of positive net absorption at the end of the third quarter of 2014, giving the industrial market 9.3 million square feet of positive absorption since the second quarter of 2010. West Orange County experienced over 623,000 square feet of positive absorption in the third quarter of 2014. We are forecasting that net absorption will continue its positive trend into the fourth quarter of 2014.
- Transaction Activity Leasing activity for the end of the third quarter checked in at 2.4 million square feet, about 250,000 square feet less than the previous quarter. Sales activity was higher than the previous year, posting 2.4 million square feet in the third quarter, compared to 1.5 million in the third quarter of 2013. This statistic can have some lag time in being reported, so look for the third quarter figures to end up somewhat higher in the next report. Details of the largest transactions can be found on the back page of this report.
- Employment The unemployment rate in Orange County was 5.4% in August 2014, down from a revised 5.8% in July 2014 and below the previous year's estimate of 6.4%. This compares with an unadjusted unemployment rate of 7.4% for California and 6.3% for the nation during the same period. According to the State of California Employment Development Department, Orange County saw a net increase of 17,900 payroll jobs from August 2013 to August 2014. Most sectors showed gains in employment; the largest gains were 5,500 in educational and health services and 5,300 in leisure and hospitality during that same period. Financial activities posted the largest year-overyear loss, dropping by 4,200 jobs.
- Overall Vacancy continues to drop, and the amount of available space has decreased significantly over the past year. A lack of product available for lease and sale in some size ranges (particularly anything below 100,000 square feet) is causing an increase in prices and a drop in transaction volume. While these are certainly positive indicators, cautious optimism still prevails, as job creation will need to continue in order to drive the demand needed to sustain growth in the Orange County industrial market.

## **FORECAST**

- **Employment** We anticipate job growth of around 2.6%, or 37,000 jobs, in the Orange County area over the year. The most rapid growth is forecast to take place in the construction, education & health, professional & business services, and leisure & hospitality sectors.
- Lease Rates Expect average asking lease rates to increase by another 4% to 7% over the next four quarters.
- Vacancy We anticipate vacancy rate continuing to descend in coming quarters, dropping by 60 basis points, to around 3.0%, by the end of the second quarter of 2015.
