Market Highlights

- Encouraging Numbers The San Diego County industrial
 market conveyed more promise of recovery in the first
 quarter of 2011. Availability and vacancy rates began
 trending downward, and net absorption was positive
 for five consecutive quarters. Demand picked up, with
 Labor Day marking the beginning of a renewed interest
 in sales transactions, and tenants began signing longer
 lease commitments. While these are positive indications,
 stability and job growth will need to be sustained in
 coming quarters to be considered recovery.
- Construction There was only 176,000 square feet of industrial construction in the first quarter. Scarce financing and low demand have essentially halted industrial development.
- Vacancy Direct/sublease space (unoccupied) finished the year at 8.23% – lower than both the previous quarter's rate of 8.34% and the year—ago rate of 8.75%. The Central Suburban market posted the lowest rate in the county at 6.05%.
- Availability Direct/sublease space being marketed was 11.69% in the first quarter of 2011 – a decrease from the previous quarter's rate of 11.94% and an even more significant decrease from the prior year's rate of 12.24%.
- Lease Rates The average asking triple-net lease rate
 was \$.66 per square foot per month, unchanged from the
 preceding five quarters, which strongly suggests that the
 market has finally reached its bottom. The record high for
 asking lease rates, \$.76, was recorded in the third and
 fourth quarters of 2008.
- Absorption The San Diego industrial market posted 178,028 square feet of positive net absorption in the first quarter of 2011, giving the market a total of 1.18 million square feet of positive absorption over the past five quarters.

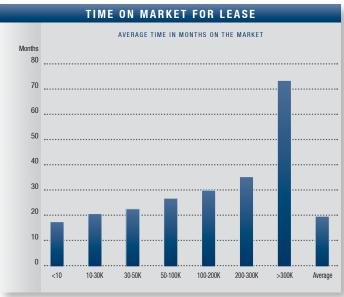

- Transaction Activity Leasing activity checked in almost 1.5 million square feet in the beginning of 2011. Sales activity also showed a year-over-year decrease, posting almost a half million square feet of activity in the first quarter 2011 as compared to the 865,000 square feet seen in the first quarter of 2010. Details of the largest transactions can be found on the back page of this report.
- Employment The unemployment rate in San Diego County was 10.1% in February 2011, down from a revised 10.4% in January 2011 and below the year-ago estimate of 10.6%. This compares with an unadjusted unemployment rate of 12.3% for California and 9.5% for the nation during the same period. According to the State of California Employment Development Department, San Diego County gained 19,100 payroll jobs from February 2010 to February 2011 10,700 in professional and business services and 3,800 in education and health services. However, construction posted the greatest year-over-year decline a loss of 1,600 jobs. Between January 2011 and February 2011 San Diego County employment increased by 4,700 jobs overall. The LAEDC is forecasting that 5,700 jobs will be added in San Diego County in 2011.
- Overall We are beginning to see a decrease in the amount of available space being added to the market. The first quarter of 2011 marks the longest trend of positive net absorption seen since 2007. With very little under construction to apply upward pressure on vacancy, the market should continue to stabilize. We expect to see an increase in investment activity in the coming quarters as lenders continue to dispose of distressed assets. We should also see an increase in leasing activity as many short—term deals come up for renewal and as job creation occurs. As unemployment rates drop and consumer confidence stabilizes, the industrial market will continue to recover.
