### Market Highlights

- Steady Growth The San Diego County industrial market continued the slow march forward in the third quarter of 2011. Availability and vacancy rates continued trending downward, and net absorption was positive for the sixth time in the last seven quarters. Demand was stifled a bit by the uncertainty in the financial markets, but the fourth quarter looks to see an increase of activity with transactions pushed to close before year's end. While these are positive indications, stability and job growth will need to be sustained in coming quarters to be prevent stalling this mild recovery.
- Construction The sluggish construction trend continued, with the 176,000 square feet delivering in the third quarter for the first delivery of the year. With nothing currently under construction industrial development is at a stand still.
- Vacancy Direct/sublease space (unoccupied) finished the quarter at 8.3% — lower than the year-ago rate of 8.73%. Poway and Kearny Mesa posted the lowest vacancy rates of submarkets with at least 5 million square feet of inventory, at 3.29% and 4.22%, respectively.
- Availability Direct/sublease space being marketed was 11.8% in the third quarter of 2011 — a decrease from the previous quarter's rate of 12.02% and an even more significant decrease from the prior year's rate of 12.36%.
- Lease Rates The average asking triple-net lease rate
  was \$.66 per square foot per month, unchanged from the
  preceding seven quarters, which strongly suggests that
  the market has finally reached its bottom. The record high
  for asking lease rates, \$.76, was recorded in the third and
  fourth quarters of 2008.
- Absorption The San Diego industrial market posted 175,884 square feet of positive net absorption in the third quarter of 2011, giving the market a total of 1.37 million square feet of positive absorption over the past seven quarters, with only one quarter of negative net absorption during that time.

- Transaction Activity Leasing activity increased 12% over the previous quarter up to 1.67 million square feet in the third quarter of 2011, mainly a result of the recent trend of short-term deals coupled with lease renegotiations. Sales activity also showed a year-over-year increase, posting 910,000 square feet of activity in the third quarter 2011 as compared to the 640,000 square feet seen in the third quarter of 2010. Details of the largest transactions can be found on the back page of this report.
- County was 10.2% in August 2011, down from a revised 10.6% in July 2011 and below the year-ago estimate of 10.7%. This compares with an unadjusted unemployment rate of 11.9% for California and 9.1% for the nation during the same period. According to the State of California Employment Development Department, San Diego County gained 13,500 payroll jobs from August 2010 to August 2011 8,600 in leisure and hospitality and 5,400 in professional and business services. However, government posted the greatest year-over-year decline a loss of 5,600 jobs. Between July 2011 and August 2011 San Diego County employment increased by 200 jobs overall.
- Overall We are slowly beginning to see a decrease in the amount of available space. The third quarter of 2011 continues the trend of overall positive net absorption since 2009. With zero product under construction to apply upward pressure on vacancy, the market should continue to stabilize, albeit at a tepid rate. We expect to see an increase in investment activity in the coming quarters as lenders continue to dispose of distressed assets. We should also see an increase in leasing activity as many short-term deals come up for renewal and as job creation occurs. As unemployment rates drop and consumer confidence stabilizes, the industrial market will continue to recover.
