

SECOND QUARTER 2021 MARKET REPORT GREATER LOS ANGELES INDUSTRIAL

OVERVIEW. Los Angeles industrial tenants and buyers continued their struggle to find quality product in 2Q. Vacancy took another dip to a record low. Net absorption was further into positive territory and lease rates posted another gain. Transaction activity was also up, as those looking for space were quick to snap anything that became available. The pandemic seems to be behind us, and employees are getting back work in the industrial sector, but "help wanted" signs are everywhere and employers are having trouble filling available positions. Demand for both sale and lease product is getting even more intense, and the low level of new deliveries has perpetuated the shortage of quality space. Port activity rose again in 2Q, a clear sign that the global supply chain is catching up after the pandemic slowdown.

VACANCY/AVAILABILITY. The overall vacancy rate in Los Angeles fell another 83 basis points to 1.76% in 2Q. All four major Los Angeles area submarkets posted declines. Central Los Angeles, the largest submarket with a base inventory of 260 MSF, has the highest vacancy rate, but it ended the quarter at a scant 2.09%. Mid-Counties vacancy now sits at just 1.02%. South Bay ended 2Q with a vacancy rate of 1.96%, while the San Gabriel Valley saw its vacancy fall 23 basis points to 1.51%. Quantity is not the whole problem, however, as a high proportion of the vacant space has various degrees of functional obsolescence, which is forcing tenants to pay record rates for inferior space or look to the Inland Empire, where supply is also running short. The availability rate, which includes vacant space and occupied space offered for sale or lease, also fell 126 basis points in 2Q, further evidence of how fast buildings are moving.

LEASE RATES. Tight supply means higher rents and that was the case again in 2Q. The average asking lease rate moved up \$0.02 in 2Q to an all-time high of \$1.09 on an industrial gross basis. But some of the higher quality buildings are marketed without asking rates, so the real asking rate is probably higher than we report. Landlords still hold all the cards in lease negotiations, and they have the luxury of choosing between several interested tenants willing to compete for their space. Concessions are at a minimum and it takes strong credit to get the attention of landlords, especially those at the institutional level.

TRANSACTION ACTIVITY. Transaction activity tracks the deals executed in a given period, and it finished the quarter at 14.3 MSF, just under 1Q's total of 15.4 MSF. Year-over-year transaction activity was up by 4 MSF, which reflects the initial slowdown that came at the beginning of the pandemic. Such strong activity is clear indication that the pandemic had little effect on market direction. In 2Q, 487 leases were signed for a total of 9.1 MSF, and another 181 properties were sold totaling 5.2 MSF. The biggest lease was a 400,000 SF space taken by Houdini, Inc. in Buena Park, and the biggest sale was a \$125,750,000 investment sale in Carson to CenterPoint Properties by Universal Warehouse Company. In fact, the five largest sales of the quarter were third-party investor deals. Total transaction activity would be much higher across the entire region if more product were available.

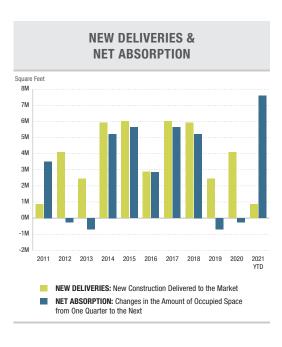

Market Statistics

	Change Over Last Quarter		20 2021	1Q 2021	2Q 2020	% Change Over Last Year		
Vacancy Rate		DOWN	1.76%	2.59%	2.89%	(39.23%)		
Availability Rate		DOWN	2.94%	3.74%	3.74%	(21.45%)		
Average Asking Lease Rate		UP	\$1.09	\$1.07	\$1.07	1.87%		
Sale & Lease Transactions		DOWN	14,302,816	15,410,316	10,480,881	36.47%		
Gross Absorption		UP	12,849,446	9,872,561	5,433,723	136.48%		
Net Absorption		POSITIVE	3,680,774	3,514,526	(958,309)	N/A		

ABSORPTION. Net absorption, the net difference in occupied space from one period to another, was relatively flat in 2Q, but was firmly in positive territory at just under 3.7 MSF, a remarkable number given such tight supply. Gross absorption, which measures total move-ins, outperformed 1Q by 1.5 MSF, ending the period at 12.8 MSF. South Bay topped all submarkets at just under 4 MSF, followed closely by Central Los Angeles at 3.7 MSF. Year-over-year, gross absorption for the entire Los Angeles market was up by more than 136%, which reflects the impact of the initial shutdown that came in March of 2020.

CONSTRUCTION. The entire Los Angeles area is starving for first-generation space. Only 2.9 MSF is in the construction queue in a 739 MSF market. Over 1.1 MSF of the space that is underway is in two cities, Irwindale at 848,000 SF and City of Industry at 280,000 SF. Another 731,000 SF is being built in the Downtown submarket. Only 9 of 49 cities across the region have a single square foot of space currently under construction. Land sites suitable for ground-up development remain scarce and prohibitively expensive.

EMPLOYMENT. The seasonally adjusted unemployment rate in Los Angeles County remained unchanged at 11.1% in May 2021, from a revised 11.1% in April 2021, and was below the rate of 18.8% one year ago. Sectors expanding employment: trade, transportation and utilities (up 3,100), manufacturing (up 2,900), and financial activities (up 100).

Forecast

The Los Angeles industrial market will tighten even further through the balance of 2021. The entire Southern California economy is recovering quickly and that will keep the pressure on lease rates, sales prices, and vacancy. We cannot expect construction to ramp up any time soon. Only six million square feet are in the planning stages and that wouldn't be enough to meet current demand if it was all under construction today. Expect demand from tenants and prospective owner/user purchasers to intensify. Institutional investors will continue their aggressive pursuit of industrial product, especially the big-box distribution buildings that are in such high demand from the e-commerce sector. That will keep cap rates at record lows.

However, the president's American Families Plan, currently being debated in Congress, contains provisions to tax capital gains at ordinary rates, limit 1031 exchanges to the first \$500,000 in gain and assess capital gains taxes at death even if the asset is held, which would effectively eliminate the step-up rule, a widely used estate planning strategy. If one or more of these tax hikes becomes law, it could have a significant impact on commercial property values.

This survey consists of buildings greater than 5,000 square feet. Lease rates are on an industrial-gross basis.

SECOND QUARTER 2021 MARKET REPORT GREATER LOS ANGELES INDUSTRIAL

The Skinny on the Proposed American Families Plan

by Matt Smith SENIOR ASSOCIATE, LOS ANGELES 424.329.7502 · msmith@voitco.com · Lic. #01999283

As we begin the second half of 2021, it is safe to say that most folks involved in the investment community are anxiously waiting to see how the new administration's tax plan unfolds. The most talked about items of the American Families Plan are the capital gains rate, step up in asset basis and carried interest.

In broad strokes, the current top-level, long-term capital gains rate of 20% is being proposed to increase to 39.6% (for investors with income over \$1M). Also, the Net Investment Income Tax (NIIT) will also continue at 3.8%, which brings the new proposed long term capital gains rate to 43.4%.

The other hot topic tax rule the step-up in basis rule. Under the current rule, the step-up in basis rule allows assets to be transferred at death without paying capital gains tax on the appreciation in value. As an example, say an investor purchased a property for \$500,000 and, once passed down to the beneficiary at a later date, it was valued at \$750,000. After holding onto the property for some time, the beneficiary ends up selling the property for \$1,000,000. As such, a tax payment will be due based upon \$250,000, which came from the difference between the \$1,000,000 selling price and the step-up in basis of \$750,000. On the other hand, without a step-up in basis, the above example would now be a tax payment based on \$500,000 instead of the \$250,000 amount.

Most of the attention has been given to the above two tax items, however, the elimination of carried interest could also be significant. Carried interest is a percentage of the profits generated by a hedge fund or private equity fund and is typically included in the managing partner's compensation. As such, carried interest plays an important role in encouraging the fund's performance.

Currently, carried interest is seen as a return on investment. Being so, it is taxed now at the 20% capital gains rate as opposed to the regular income tax rate of 37% (for those whose incomes are over \$1M.)

The legislation under consideration, if approved, would raise the long-term capital gains tax rate for investors to whatever federal rate the owner is currently paying on ordinary income. So, for investors with income above \$1M, the percentage would nearly double from 20% to 39.6%.

However, carried interest is not easily achieved. It should be noted that if the managing partner of the hedge fund or private equity fund does not achieve the agreed upon rate of return, then the partner does not receive a carried interest. Instead, they may even have their share "clawed back" for lackluster performance.

Some believe that plans will get trimmed down a bit and try to "meet somewhere in the middle" but only time will tell.

Product Type

MFG./DIST.

Manufacturing / Distribution / Warehouse facilities with up to 29.9% office space.

Submarkets

CENTRAL

Bell/Bell Gardens/Maywood, City of Commerce, Huntington Park/Cudahy, Downtown, Montebello/Monterey Park, Pico Rivera, South Gate, Vernon

MID COUNTIES

Artesia/Cerritos, Bellflower/Downey, Buena Park/La Palma, La Mirada, Norwalk, Paramount, Santa Fe Springs, Whittier

SAN GABRIEL VALLEY

Alhambra, Arcadia/Temple City, Azusa, Baldwin Park, City of Industry/DB/ HH/RH, Covina/West Covina, Duarte, El Monte, Irwindale, La Puente, La Verne/San Dimas/Glendora, Monrovia, Pomona/Claremont, Rosemead/San Gabriel, South El Monte, Walnut

SOUTH BAY

Carson, Compton, El Segundo, Gardena, Harbor City, Hawthorne, Inglewood, Lakewood/Hawaiian Gardens, Lawndale, Long Beach/Terminal Island, Lynwood, Rancho Dominguez, Redondo & Hermosa Beach, San Pedro, Signal Hill, Torrance, Wilmington
