IE4Q21 FOURTH QUARTER 2021 MARKET REPORT

OVERVIEW. The Inland Empire is white hot and shows no sign of slowing down in the near future. Total inventory rose to 616.5 MSF after Q4 new deliveries, further solidifying the region's status as one of the nation's largest distribution hubs. The e-commerce boom rages on, but that is only part of the story. The entire industrial sector seems to be in growth mode with an insatiable appetite for quality first- and second-generation space. The pandemic actually gave the region a boost, as consumers were forced into adopting the online sales platform. In Q4, construction activity rose and the list of planned projects lengthened, especially in the IE East. Vacancy fell to a record low, despite the strong quarter for new deliveries. Space in all size ranges, whether for lease or sale, remained in short supply.

VACANCY & AVAILABILITY. The vacancy rate in the Inland Empire fell another 15 basis points to 0.87% in Q4, the third straight quarter under 1%. Year over year, vacancy has fallen by more than 76% despite a flood of new deliveries throughout the region. However, the IE-West submarket, with a current inventory of over 333 MSF, experienced a slight increase in vacancy to 1.08% in Q4, mainly due to the timing of new deliveries. The IE-East submarket fell 45 basis points to just 0.62%. The vacancy rate by size range tells another story. The rate is 0% for spaces greater than 250,000 SF in the IE East, while vacancy for buildings from 100,000 to 250,000 SF in the same area is 2.44%, still low, but reflective of the insatiable demand from the largest logistics users.

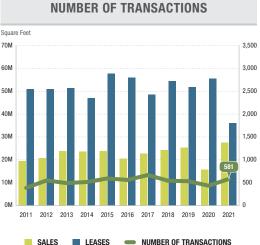

LEASE RATES. The increase in the average asking lease rate for the Inland Empire in Q4 was astonishing. It climbed \$0.11 to \$1.00 PSF in just three months. For the year, the rate rose by almost 29% fueled by relentless demand, especially for highly efficient, first-generation space. It is important to note that actual rates can be much higher because a substantial portion of the available inventory is being offered for lease without an asking rate. Those buildings tend to be of higher quality and lease at premium rates. It is now common to hear about leases being signed at initial lease rates of \$1.30 or more on a NNN basis. IE West rates tend to run higher, but IE East is seeing significant increases.

TRANSACTION ACTIVITY. Overall lease and sale transaction activity for Q4 was little changed from Q3 at 17.6 MSF. 142 lease transactions accounted for 11 MSF of that total, with 6.6 MSF sold in 96 separate transactions. In the past year, 70.8 MSF of space has either been leased or sold in the Inland Empire and the region carries tremendous momentum into the new year. The IE East saw the biggest lease of the quarter, a 1,203,000 SF lease from Duke Realty to Loctek, Inc. in Perris. The City of Victorville logged the biggest sale of Q4, a \$270 million sale of a 3.3 MSF project of 7 buildings from Prologis to Covington Group, Inc.

ABSORPTION. Inland Empire net absorption (the net difference in occupied space from one period to another) declined slightly in Q4 to just under 5.6 MSF. However, gross absorption, which measures total move-ins, more than doubled in the same period to 12.2 MSF. The

 VACANCY: Total Vacant Space Divided by Total Existing Inventory
AVAILABILITY: Total Amount of Space that is Available whether Occupied, for Sublease, or Available at a Future Date
AVERAGE ASKING LEASE RATE: NNN / SF / Month

TRANSACTION VOLUME & NUMBER OF TRANSACTIONS

IE4021 INDUSTRIAL

increase reflects the delivery of new inventory that is immediately occupied upon completion by users moving out of existing facilities. Over 56% of the absorption for the entire region was in spaces larger than 500,000 SF. For the full year, the IE recorded a 26.5 MSF gain in occupied space.

CONSTRUCTION. A steady flow of new projects has been underway in both major submarkets for many years. That trend accelerated in Q4. Over 22.7 MSF of space is in the construction gueue throughout the region, almost evenly distributed between the East and West submarkets. That is up from 18.6 MSF in the previous quarter. The IE is still the only major market in Southern California with significant construction activity. Another 72.4 MSF is in the planning stages with almost 88% of that total attributed to the IE East submarket where large land sites are still available. Of significant note is the fact that almost 85% of the space to be built will be in buildings over 500,000 SF, predominantly in the IE East.

EMPLOYMENT. The unemployment rate in the Riverside-San Bernardino-Ontario MSA was 5.4% in November 2021, down from a revised 6.3% in October 2021, and below the year-ago estimate of 7.8%. Trade, transportation, and utilities (up 12,600) recorded the largest payroll increase over the month, with transportation and warehousing (up 6,400) recording the bulk of the gains.

Forecast

The Inland Empire industrial market looks to stay on its current trajectory in 2022. Developers can't deliver new projects fast enough to meet what seems to be an insatiable appetite for space from the logistics sector. Vacancy fell under 1% in 2021 and will stay there for the foreseeable future. Companies are not just moving — they are expanding in a big way. That will keep net absorption firmly in positive territory and encourage developers to aggressively pursue new projects. Lease and sale activity will rise as long as construction of state-of-the-art distribution facilities continues at the current pace. Institutional buyers will continue their acquisition binge, attracted by the large deal size, strong rent growth and product type that meets the needs of the growing e-commerce and logistics sectors. Land and building costs will continue to rise, but developers will count on continued rent growth to cover those costs.

With the threat of tax hikes associated with the Build Back Better Act on shaky ground, inflation will be the major threat in 2022. The Fed has made clear it no longer sees the recent spike in inflation as transitory and is responding by ending its bond-buying program and considering several Fed Funds rate hikes during the year. That could slow down business growth, but demand for space is so far out in front of supply that the IE should fare well even if inflation persists.

This survey consists of industrial buildings greater than 5,000 square feet. Lease rates are on a triple-net basis. Some buildings do not quote asking rental rates and therefore are reflected as \$0.00.

FOURTH QUARTER 2021 MARKET REPORT

Depleted Inventories

by Juan Gutierrez SENIOR VICE PRESIDENT / PARTNER 909.545.8008 · jqutierrez@voitco.com · Lic. #01777990

The Inland Empire industrial market has continued to benefit from the disruptions brought on by the pandemic. There is little to no inventory anywhere in Southern California and this is leading to significant rental increases across the entire market. Tenant demand, particularly from e-commerce and logistics users, is outpacing supply and has created an environment where tenants are getting into a competitive bidding war for the few buildings that are available.

This has led to a spike in lease rates and sale prices. The official numbers show an increase in the average asking lease rate of 28% (from Q4 2020 to Q4 2021), however, in many instances we have seen actual lease rates jump nearly 50% year over year. Landlords are often waiting until buildings are complete before engaging with tenants/ buyers as they expect that lease rates and sale prices will continue to escalate. We are also seeing fewer landlord concessions (little to no free rent) as well as an increase in the annual rate escalations... the days of 3% annual escalations are now gone.

Interest from developers continues to be strong but many are having trouble finding sites due to lack of available land in all submarkets of the Inland Empire. Many are having to get creative in assembling land parcels to accommodate larger sites, or they are forced to head to cities further east to find suitable opportunities. Land pricing is at all-time highs, with land values in the West IE exceeding \$100 PSF and in the East IE pricing has now pushed past \$40 PSF. Developers are also running into construction delays, particularly due to delays in buildings materials (especially roof trusses) which has led to a further tightening of inventory.

We continue to see growth from the existing tenant base, new e-commerce requirements and 3PL activity. The Inland Empire also continues to be the beneficiary of expansion from tenants located in Los Angeles and Orange County as both of those markets also have little to no existing inventory. Los Angeles and Orange County generally have older product, so tenants that are looking for Class A buildings are left with the Inland Empire as their only option.

Overall fundamentals remain very strong. There are more tenants than available buildings and with vacancy below 1%, 2022 looks to be another strong year.

Product Type

MFG./DIST.

Manufacturing / Distribution / Warehouse facilities with up to 29.9% office space.

Submarkets

WEST

Chino / Chino Hills, Fontana, Mira Loma / Eastvale / Jurupa Valley, Montclair, Ontario, Rancho Cucamonga, Upland

EAST

Banning, Beaumont, Bloomington, Corona/Norco, Colton/Grand Terrace, Moreno Valley, Perris, Redlands/Loma Linda, Rialto, Riverside, San Bernardino/Highland

HIGH DESERT

Adelanto, Apple Valley, Barstow, Hesperia, Victorville

TEMECULA VALLEY

Hemet, Lake Elsinore, Menifee, Murrieta, San Jacinto, Temecula, Wildomar
